Tolerances - Functionability

Tolerances in manufacture of standoffs and spacers

Diameter:

±.006

except where otherwise noted

Length:

1. Up to 4" long all are kept to ±.005
2. 4" to 6" long ±.008
3. Over 6": long ±.010
4. Nylon Parts ±.015

Amatom reserves the right to make adjustments in dimensions and specifications at any time without notice. Customer's inspection should be determined primarily on functionality.

**Externally
threaded products
made from
Brass or Steel**

i.e. Male/female standoffs
or captive screws

The external threads are manufactured to a pre-plated condition to accommodate the plating process. Unplated parts will accept the standard no-go gauge.

On a special order basis, Amatom will manufacture these products for applications that do not require plating, and will not be made to a pre-plated condition.

Anti-Rotation Swage Standoffs

3-4 times more holding power than conventional standoffs. The Amatom high torque (anti-rotation) swage standoff is designed primarily for installation in epoxy glass, phenolic boards and aluminum panels or chassis. This broaching type standoff literally cuts its way down into the mounting material, biting in for torque resistance. The knurled shank feature eliminates electrical connection breaks due to loosening and spinning of the standoff under high torque conditions.

Performance Data Average Torque Load (inch-pounds)

Amatom can supply an O-ring for sealing for all internal and external thread folding handles. Catalog pages 128-150.

O-rings are Nitrite (Buna N) per Mil-P-25732 and conform to MS-28775.

For an Amatom listed handle size – select part number that you need and add "Modified O-ring" to number. For sizes not listed, send in print and we will quote to your print.

NOTE: Not all folding handles can be modified for O-rings. Consult with factory before selecting handle part number.

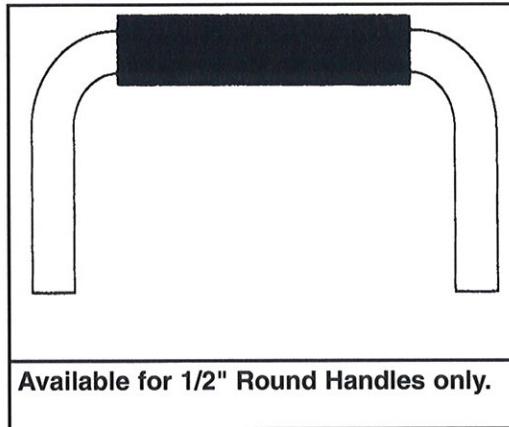

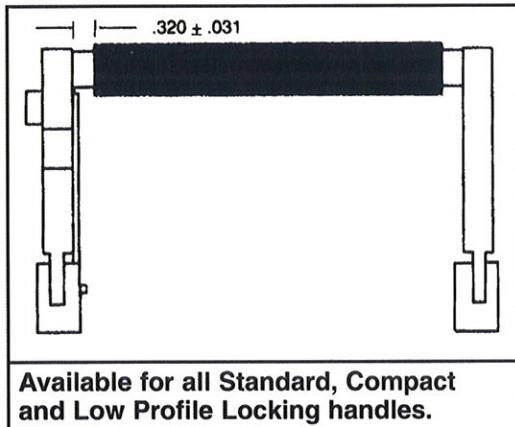

OPTIONAL NEOPRENE GRIPS

Optional neoprene grips may be specified with any of above handle families by adding the code listed in the chart after the part number and before the finish code.

EXAMPLES: 80428-2N
 80461-3N

CODE	FOR HANDLE STOCK	NEOPRENE
2N	1/2"	3/4"
3N	1/2"	1"
TOL + 1/31"		

NOTE: Grip length is determined by the length of the handle. Grip will end at the beginning of the radius of the bend.
 Tolerance on grip length is $\pm .031$.
